OLIGOMERIC PROTEIN

PETITION FOR WITHDRAWAL OF HOLDING OF ABANDONMENT
BASED ON FAILURE TO RECEIVE OFFICE COMMUNICATION

COMMISSIONER OF PATENTS AND TRADEMARKS
ALEXANDRIA, VA 22313-1450

SIR:

In accordance with the requirements of M.P.E.P. §711.03(c), Applicants hereby petition to withdraw the holding of abandonment based on failure to receive the Office Communication mailed on November 26, 2003, for the above-identified application. In support of this petition, Applicants provide herein a statement from the practitioner stating that the Office Communication was not received by the practitioner and attesting to the fact that a search of the file jacket and docket records indicates that the Office Communication was not received. In addition, Applicants submit herewith a copy of the docket record where the non-received Office Communication would have been entered had it been received and docketed.

In response to a Status Request filed on May 10, 2004, Applicant's Representative was advised by way of a Notice of Abandonment under 37 C.F.R. 1.53(f) or (g) that an Office Communication for the above-identified application was mailed on November 26, 2003. However, no such Office Communication was received.

In light of the fact that the six-month period for response to the Office Communication would have expired on May 26, 2004, Applicants, through counsel of record, respectfully request that any holding of abandonment for the above-identified application be withdrawn due to the fact that the Notice To File Missing parts was not received by Applicants' Attorney. The facts concerning this matter are as follows:

Upon receipt of Patent Office mail in this firm, all mail is opened and logged in a daily mail log, the due date entered in a manual docketing book and entered in the firm computer docketing system. At the time of entry into the computer, the serial numbers are checked to ensure that the correct docket number appears on the mail so that the documents are entered in the correct application in the computer and matched with the correct application file. Any due dates resulting from the Patent Office mail are also entered in the computer.

Upon being informed by the Office that an Office Communication had been mailed, the computer was checked to determine the current status reflected therein (a hard copy of the record for the above-identified application is attached herewith). The computer status section for the subject application did not show receipt of an Office Communication, which would appear in the "Actions and Due Dates" section, nor did it show a current due date for responding to the Office Communication which would appear under "Due Dates". The attached computer print-outs for this application show neither of these entries.

The application file was also pulled and both the front docketing section and the full contents of the file were reviewed. The application file docketing section showed no entry of an Office Communication in the application, and no Office Communication was found to be in the file. A Status Request was filed in the PTO on June 30, 2003, requesting the status on the above-identified application; however, no reply was received from the Office in this regard. A second Status Request was filed in the PTO on November 14, 2003, requesting the status on

the above-identified application; however, no reply was received from the Office in this regard.

A third Status Request was filed in the PTO on May 10, 2004, requesting the status on the above-identified application; however, no reply was received from the Office in this regard.

Only the Notice of Abandonment was received.

In light of the foregoing explanation and the attached computer print-outs submitted in support of this request, abandonment of this application is deemed unavoidable due to non-receipt of the Office Communication that was apparently mailed on November 26, 2003, and the restoration of this application to the pending files and re-mailing of the Office Communication is earnestly solicited.

The undersigned petitioner declares further that all statements made herein of his own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issuing thereon.

Please charge any fees for the papers being filed herewith and for which no check is enclosed herewith to deposit account No. 15-0030. A duplicate copy of this paper is enclosed.

Respectfully submitted,

OBLON, SPIVAK, McCLELLAND,
MAIER & NEUSTADT, P.C.
